

SWENG 500, Team 3 Week 13 Progress Report

Deliverables Required for Week 14

- Requirements specification
- Architecture and design documentation
- Testing report
- User manual

Week 13 Update

Code is frozen. User manual is created, and some detail needs to be added. Gregg has been working the user manual with the team's assistance. The software architecture and design document is created and needs review by the team. The testing report is created and needs review by the team. The requirements specification is created and needs review by the team.

No issues at this time.

Project submission should be Thursday for Team 3 to accommodate for everyone travelling to graduation!
